SUMMARY

I have a strong foundation in full-stack development, particularly in JavaScript, React, Node.js, and MongoDB, alongside a solid grasp of data structures and algorithms. My hands-on experience includes creating dynamic and responsive web applications. I'm driven by the challenge of solving practical problems and look forward to contributing my skills to impactful software engineering projects.

PROJECTS

ChatApp [Github](#)

March 2024-June 2024

- Designed and developed a real-time chat application with a responsive and intuitive user interface using HTML, CSS, and JavaScript.
- Created a RESTful API using a server-side programming language to manage chat messages, user authentication, and backend logic.
- Implemented real-time messaging with SOCKET.IO, adding features like typing indicators, read receipts, and message broadcasting via a message queue.

BookingApp [Github](#)

July 2024-Ongoing

- Developed and deployed a full-stack booking application using React for the front end, Node.js and Express for the back end, and MongoDB for data storage.
 - Designed the application to be scalable and ensured a seamless user experience with robust performance.
 - Integrated secure authentication and authorization using JWT and bcrypt, enabling users to register, log in, and manage bookings securely.
